

BioDefense SCT

Self-Cleaning All Purpose Cleaner

BioDefense SCT (self-cleaning technology) is the latest advanced cleaning system from DevMar designed to improve cleaning, reduce labor and extend the life of cleaned surfaces.

After surfaces are cleaned with **BioDefense SCT**; a high energy substrate is formed that causes water and even oils to “flatten” and sheet off the cleaned surface (taking along with it dust and salts that may have accumulated).

Routine cleaning with **BioDefense SCT** means water spotting and hard water deposits will become history, and you'll put an end to intense scrubbing for removal of oily soils, hard water deposits, and soap scum! Additionally, BioDefense SCT will make your mirrors and glass FOG FREE!

BioDefense SCT makes future cleanings easier and less frequent and is an awesome streak free and no rinse multipurpose cleaner!

One Product for Hard Surface Cleaning

- | | | | |
|-------------------|--------------------|--------------|---------------------------|
| • Glass | • Aluminum | • Concrete | • ABS |
| • Stainless steel | • Clear coats | • Masonry | • Polycarbonate / Styrene |
| • Ceramic | • Painted Surfaces | • Stone | • Acrylics |
| • Plastics | • Steel | • Composites | • Grout |

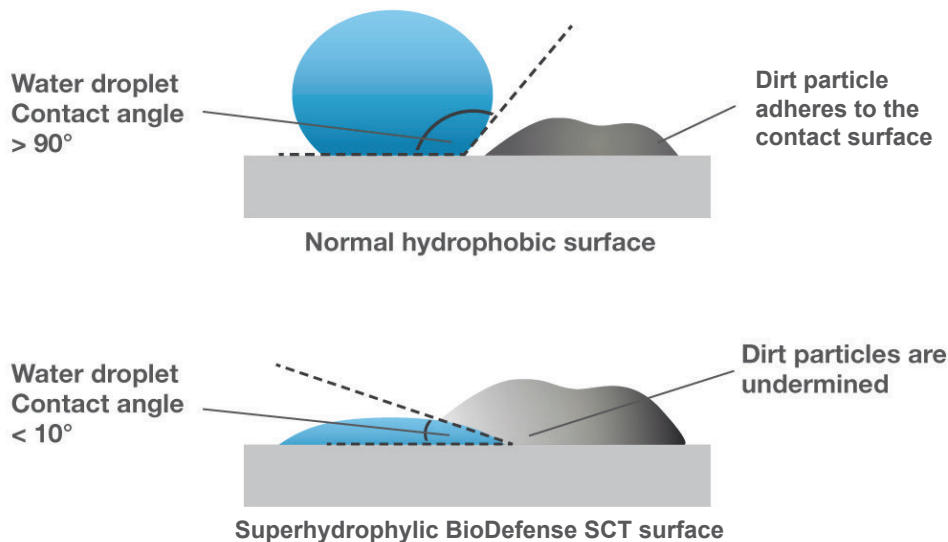

Suggested Application Sites

- | | | | |
|----------------|-----------------------------------|--------------|------------------|
| • Windows | • Sinks | • Spas | • Buses |
| • Mirrors | • Showers | • Appliances | • Watercraft |
| • Tubs | • Restrooms | • Vehicles | • Railings |
| • Urinals | • Pools | • Trains | • Light Fixtures |
| • Ceiling Fans | • Hard To Reach Vertical Surfaces | | |

BioDefense SCT can be designed as an end of hose no rinse glass and surface cleaner and is self-drying. It may also be dispensed via a routine spray bottle for spray and wipe applications.

Typical Issues and Resolutions with BioDefense SCT

Note: BioDefense SCT is not your typical "RainX" type cleaner (hydrophobic) designed to eventually bead off water. At issue is the beads hang on to the surface and still leave you with spotting issues. BioDefense SCT will not bead the water but produce water sheeting (hydrophilic) to help self-clean (picks up soils while sheeting) the surface.

Glass Doors and Windows: Ever clean a store front or sliding door window just to see that same day a shower or sprinkler dirty it up? Outdoor glass is subject to dirt, dust, grime, biofilm, salt, and calcium. Over time the glass can become cloudy and even harder to clean. Always clean interior glass and mirrors to eliminate fogging! **BioDefense SCT** will reduce the scheduled cleaning times by at least 50%. Plus, you will have little to no spotting in between!

Shower Tiles and Glass: Removing hardwater and soap scum from shower walls and glass is a formidable task. **BioDefense SCT**, when routinely used, will totally prevent this build-up! In addition; bacteria, mold, and mildew will find it difficult to adhere which translates to no funny odors hanging around. Detailing a shower will no longer be necessary resulting in less chemical use and tremendous labor savings.

Balcony or Viewing Glass: Select areas within facilities or transportation venues highlight specific views where the user must see through glass or certain plastics. Consider how disappointing it would be to arrive at such a viewing site only to have to peer through water spots and stains. No one can be expected to clean this viewing glass after every rain shower. However, routine cleaning with **BioDefense SCT** will work for you 24 hours a day! Customers, friends, and family will be able to enjoy and appreciate the view as it was intended.

Automotive and Trains: Wipers work on the front windshields, but what about all the other windows? Unless just cleaned (after driving in rain or snow) they are spotted, streaked, or flat out dirty; right? **BioDefense SCT** will resolve this. Plus, since **BioDefense SCT** is approved for other surfaces it can be applied to the vehicle itself to reduce cleanings and easily wash off bugs and bird droppings.

BioDefense SCT was designed to work in conjunction with BioDefense 24/7 non-stick antimicrobial nano coatings.
